Project Wingman > General > Topic Details PW-Mk11 missin RG and BLM-U So I been the game today and finally unlocked the PW-Mk11, which, from what i understand, is supposed to have a fixed loadout of Standard missiles, rail gun, and the swarm rockets. However it seems to only have the explosive cannon and missiles. All other slots are empty as if they were on the "screensaver". I need for something to unlock for the internet, but can't find anything about it and in videos of people flyin PW-Mk11 they just have the BLM-U or the 2nd slot and RG on the 3rd. What am I missing here? Note: This is ONLY to be used to report spam, advertising, and problematic (harassment, fighting, or rude) posts. Note: This has been locked Can't login after changing password I have recently had to uninstall and redownload steam and could not remember my old password. I have reset my password but when I try to log in it says I have entered an incorrect password.I have tried now to reset my password five times, each with a new password, but get the same error every time I try to log in.Please help Note: This is ONLY to be used to report spam, advertising, and problematic (harassment, fighting, or rude) posts. Grand Theft Auto V Legacy > General Discussions > Topic Details Cannot Login [SOLVED] I've downloaded and installed GTAIV from steam, including the rockstar games launcher obviously and granting admin privileges when asked.When i hit login after entering my credentials, nothing happens.There is no loading icon and the color of the login button doesn't even change.I've closed and restarted the game aswell as steam several times, also restarted the computer and tried to login from different ip addresses, the result is always the same, nothing happens when clicking login.For the big-brainers asking if i entered the correct login credentials, yes it works on my webbrowser if only doesn't work with socialclub on my pc.Rockstar suppor apparently is too incompetent to offer any guidance.
