By the end of March 2022, the combined versions had sold 13.01 million copies worldwide, making it one of the best-selling 3DS games. Animal Crossing New Leaf is a real-life simulation game and is the fourth main title in the Animal Crossing series. This game is one of Nintendo's great achievements and great pride. Meet Animal Crossing New Leaf Become the new mayor and live your dream life in a poetic city It's completely different Animal Crossing New Leaf In this world, some things are strangely appealing. And you have to admit, the crazier the world gets, the more compassion people find in what used to be normal.how monotonous? Animal Crossing New Leaf is a game that combines everything boring and makes it inexplicably magical. Animal Crossing New Leaf is one of the seven installments of the Animal Crossing series. The New Leaf edition was released in 2012 and was one of the first 3D games available for the next generation Nintendo. Compared to the entire Animal Crossing life simulation series, Animal Crossing New Leaf is believed to have breathed new life into the series, making it more diverse and accessible. If in other jobs you are a boy or a weird girl who drives into a village and slowly thinks about the life around you, then in Animal Crossing New Leaf you will be the mayor of a small town. There is a lot of power in the hands, and of course it is not enough to be an ordinary citizen. The game is still kept in a non-competitive style, there is no rush, as is often the case in the Animal Crossing franchise, but working in this new role is much more epic, spectacular and real compared to other works. You should focus on public things like greening the forest, building bridges, opening shops, building police stations, schools and clinics. Due to its realism and somewhat strange features, Animal Crossing New Leaf has its charm, especially with a large number of adult fans who live day after day in the world of Animal Crossing and are also a bit bored with childish play. whole day. Cute game will make you play. First of all, I find the essence of the game friendly, easy to play, soft in the sense that it couldn't be softer. You are the only mayor, the rest of the inhabitants are nearby in the form of a cute pet, but they talk, live and act like people. In the game, you live an ordinary life just like in real life, eating, experiencing, making friends, observing, doing community work, making big and small decisions. But don't forget to walk and do all kinds of things like talking to the locals, editing maps, going to school.children, walking alone in the fields, watching the sunset... There is no mission, just enjoy life. There's a lot to do in Animal Crossing New Leaf. But there is no mission at all. The game doesn't even have any competitive elements, time, place or order of execution. You just travel everywhere, do what you want as the new mayor and experience all the feelings you have in this life. The appeal of the game lies in the ordinary things like walking down a village street, pushing through green trees and the wind rustling your hair. A romantic world that has matured a bit but still retains its innocence and purity in Animal Crossing New Leaf will soothe your soul and heal all wounds. The good thing is that large and small interactions in the game will lead to many different progressions. And nothing as soft or painful as some RPGs. They are all very gentle, nice. The game is also endless, just keep playing until you don't want to play anymore. To date, there have been 7 parts of this series, including Animal Crossing New Leaf, and each world in it is infinite. So you can comfortably play and do whatever you want. I said before that when you play games you live your life because game time is real time. For some holiday-related events, a major event of the year will be like real life. If the set time is the same as in real life, it will be easy to evoke empathy and emotion. Animal Crossing New Leaf has a lot of NPCs. The level of customization and variety on all fronts in Animal Crossing New Leaf is immeasurable. The fact that the characters are personified is living proof of this. Importantly, each character has its own personality, form, and stories that are revealed by talking to the mayor. They are viable and prove themselves not only as decorative plants. With the power of the plague, you can do many things you can only dream of: createStonehenge miniature model on the beach, Zen bell right next to the bus station, fountain in the city center The game allows you to change your world step by step, every day, in your own way. The interesting feeling of seeing things happen your way is one of the reasons why players enjoy playing this game because you are an important part of the world. Cute characters Overall graphics Animal Crossing New Leaf, not just characters, will capture your heart from the first minute of the game. Natural movement, dynamic colors, full of poetic nature, meticulous details, each animal, each scene has its own attractive characteristics. Download Animal Crossing New Leaf 3DS ROM and CIA Think only kids play colorful games full of cute wild animals? I can tell you that Animal Crossing's customers in general, and Animal Crossing New Leaf in particular, are mostly adults. The older you get, the more you want to find the sweet corners of your soul, the more you want to relive your childhood days. And Animal Crossing New Leaf is even closer to adults, as some community responsibilities fall on their shoulders. When you play games, you not only play, but also bring back childhood memories.
