How to recover permanently deleted videos from android phone without root. Best android app to recover deleted videos without root. Recover deleted videos from android internal memory without root.

Did you lose your valuable videos from your Android phone and look at how to recover permanently deleted videos from Android phone without root? Don't panic, there are ways to retrieve deleted videos. Lots of users come across data loss situations and lose their valuable videos from their Android devices. We all know that the data stored on our Android devices are important and any single data if lost or deleted can be terrifying. Many users want to know if there are ways to retrieve data without rooting their devices. Yes, there are methods that don't require any kind of rooting your device. To help you out, I will suggest you read this blog and know some effective ways how to recover deleted videos from Android without root. Part 1: Use Android Data Recovery To Recover Deleted Videos From Android Phone (Without Root) Are you looking for a reliable and effective method to retrieve disappeared videos from Android? If yes then here is the complete solution: Android Data Recovery. This is a professional recovery tool that will easily solve deleted video problems. It scans the entire device to find and recover deleted files from Android phone internal memory. You don't have to root your device because its user-friendly interface allows you to rescue every lost file from your phone. The best part is it not only recovers videos but other Android data are also restored like contacts, photos, text messages, audio files, documents, notes, WhatsApp messages, etc. So you simply need to download Android Data Recovery software and recover deleted videos from Android phones without root. Android Data Recovery- Recover lost/deleted data from Android phones The best and effective tool to recover lost, deleted, inaccessible data from Android phones. Some unique features include: Directly recover several data types like photos, contacts, SMS, videos, WhatsApp, call logs, documents, notes, etc. Recover lost data in any critical situation like a broken screen, accidental, unintentional, factory reset, formatting, virus attack or other reasons Provides one-click option to "Recover" deleted files without backup Check out The Steps For Android Data Recovery Part 2: Recover Deleted Videos From Android Phone Via Manual Methods There are several manual methods as well that can help you to restore videos from Android without root. They all are simple and easy to follow. So let's walk through them: Way 1: Get Back Deleted Videos Using Android Backup Obviously, you might have created a backup of all your important files from Android or might be automatically backed up. In such a case, you don't have to root your device. Follow the below steps: First, go to Settings > click on Account Now sign in with a Google account and password when required After that, click on "Backup and Restore" > tap on "Restore" Next, choose the backup folder that contains deleted videos and photos And that's it, now wait, for the entire process to finish and then access them as before. Way 2: Google Photos- Restore Disappeared Photos From Android Phone Without Root Google Photos is yet another easy and best option to recover deleted files from Android. Whenever you click any pictures or record videos then they also get saved on Google Photos If you have enabled the sync option. Follow the steps to recover deleted videos/photos from Google Photos without root: Open the Google Photos app on your Android phone and there you can see all data like videos. Otherwise, click on the upper left corner and choose the Trash/Bin option Here, check all the deleted items and select videos you want to restore Finally, tap on Restore to recover deleted videos from the Android phone without root Way 3: Recover Deleted Videos From Android Phone Without Root Using Google Drive/Trash Google Drive is cloud storage where users can store their useful videos, photos, and other data up to 15GB. It allows users to upload and even synchronize files from their Android phones. This is easy to use and one of the safest ways to backup your entire content safely. Here are the steps to recover videos from Google Drive: First, open Google Drive on an Android phone > click on My Drive Check all the videos you want to restore If they are available then select the one you want and click on the Download option Here are the steps to retrieve deleted videos from the Google Drive Trash folder Open Google Drive and click on the My Drive option on the top left Now click on the Trash option There, choose the videos you want to restore and then select the Restore option That's it, now all your videos are recovered from Android without root. Way 4: Use GT Recovery To Recover Deleted Photos From Android Without Root There are many third-party apps you can get to help you when you actually need them. In this situation, one such app is GT Recovery. This will help you to recover lost videos from your Android phone that are deleted due to any reason. It let you preview the deleted stuff before you restore them. Follow the below steps to recover videos without roots: First, download GT Recovery, then open, and click on the category icon as per your choice. Just for example, if you want to recover videos, click on Recover Videos > tap on Start new scan for the deleted files After that, you will see the items on the interface. Then select the videos that you want to recover and you can access them without rooting your phone Way 5: Use DiskDigger- Recover Lost Videos From Android Phone You might know about the DiskDigger app which is mostly recommended by many experts to retrieve lost files from Android phones. Using this program, you can scan the entire device for the deleted items, and is easy to use. You only have to choose the file types and after that select drive, you want to scan. Your important data like videos, photos, and other stuff are retrieved. Check out the below steps: First, download and install DiskDigger on your Android phone. Next, click on Allow option if ask to grant data access After that, you will see two options: Start a basic photo scan or a Full scan. (select former when you don't want to perform a scan with root) Now choose the deleted videos you want back and tap on the Recover option to recover deleted videos from Android phone without root Conclusion Videos are equally important for users as other data saved on the phone. But sometimes, several reasons lead to the deletion of videos and users think they have to root their device before recovery. However, the good news is that there are lots of ways that can help you to recover deleted videos from Android without root. This blog totally describes the best 6 methods that will help you to retrieve lost videos from an Android phone without root. For instant recovery, I will suggest you use Android Data Recovery software. It's a professional recovery tool to rescue disappeared or deleted videos from Android. You can further reach us through our social sites like Facebook, Twitter. Harry Johnson is a technical writer and has experience of 7 years in SEO. He gathers effective solutions to deal with all problems like data recovery, errors, and others related to Android & iOS (iPhone/iPad/iPod Touch) devices. How to recover deleted videos from Android phones without root is a common question from many users. When users lose their essential videos then they think that they have to root their device to get back the missing videos. However, every piece of data on the Android phone is important, and losing them can be terrifying. But there is nothing to worry about as various ways are available to recover deleted files from Android without rooting. Here in this blog, I will guide you on how to recover deleted videos from Android phone without root using automatic and manual methods. Is It Possible To Recover Lost Videos From Android Without Root? Once you come across a severe data loss situation, you are in a hurry to find out the recovery methods to get those videos back. But you stuck at a point that whatever recovery programs are available, they need to root the device first. At that moment, a question strikes your mind: is it possible to retrieve videos from Android without root? The simple answer is Yes, there is a chance to get back lost videos from Android without root. There are several backup options where your data might be saved and you have the option to restore them. If not then a professional recovery tool like Android Data Recovery easily restores lost videos from the phone. Part 1: Best And Effective Way To Recover Lost Videos From Android Without Root Android Data Recovery is one of the best and highly suggested software that recovers deleted videos from Android phones without root. It's a professional program that works in any data loss situation to retrieve disappeared files. Not only videos but it restores other Android data as well such as contacts, photos, documents, notes, WhatsApp messages, call history, music files, etc. It supports all Android phone brands like Samsung, LG, HTC, Lenovo, Sony, Huawei, Google, Xiaomi, and others. The recovery software allows you to preview the stuff before recovery and allows you to select the items you wish to recover. Therefore, without any worry, you simply need to download Android Data Recovery and recover deleted videos from Android phones without root. Follow the user guide to know the steps on how to use the software. btn_imgbtn_img Part 2: Manual Methods To Retrieve Lost Videos From Android Phone Without Root When you don't want to root your device and want the missing data to recover then there are several manual methods to follow. Mentioned below are a few of them: Method 1: Restore Videos From Android Phone Without Root Using Google Photos You might know about Google Photos that offers you to store unlimited photos and videos with high quality. However, if you have enabled the sync option then all clicked pictures and videos are automatically backed up to Google photos. Or even you can check those items in its Trash bin if deleted accidentally. Follow the below steps here: First, open Google Photos on your device There you can see all the saved photos and videos If you cannot find it then click on "Menu" and then on "Trash" After that, choose the videos that you wish to recover and finally tap on "Restore" Method 2: Use Google Drive To Recover Videos From Android Phone Without Root There are several cloud storage and Google Drive is one of them. It allows you to store files up to 15GB and your videos, photos, etc. can easily be uploaded or synced to Google Drive. Your videos can present on its Trash folder as well, so you should check the entire cloud service properly. Here are the steps to follow: First, open Google Drive on your phone and click on the My Drive section Here you can see all the uploaded or automatically synced videos or other data Select the videos that you want to restore and finally tap on the Download option If you don't get the files then check its Trash folder From there, choose the one you need to restore and then tap on the Restore option to restore deleted videos from Android phone without root. Method 3: Use Third-Party Tool DiskDigger To Recover Videos Without Rooting Android Phone When you accidentally delete the files from your phone and don't know how to retrieve them then DiskDigger can help you. It's a powerful tool that scans the entire device to find out the deleted items. It is very easy to use and only requires choosing file types that you want to recover. Besides recovery of videos, it can also restore photos and other files. So let's move to the steps to recover videos from Android phone without root using DiskDigger: First, you have to download and install the DiskDigger app on your device. After that, click on the Allow option when it asks to grant access to data After that, choose START BASIC PHOTO SCAN or FULL SCAN (when you don't want to perform a scan with root, select former) Now choose the videos and tap on RECOVER That's it. FAQ: Yes, there is a possibility to recover lost videos from an Android phone. This is because the files are not permanently removed immediately. They only get hidden but with the use of recovery software, the lost videos and other data can be recovered. Yes, lots of apps are available in Google Play Store that can retrieve deleted videos from Android phones. Even you can check your backup files if available. If not then using a professional recovery tool can help you to get back missing videos from your phone. There are few important things that you should pay attention for after losing videos from the phone. Don't forget to create a backup of all your important videos and other files in a safe place Once files are deleted, stop using your phone to avoid overwriting data to prevent permanent data loss Find reliable software like Android data recovery to recover deleted videos from Android phone without root Conclusion So, here the blog comes to an end where I have discussed several methods to recover deleted videos from Android phones without root. All the methods are easy to follow and will successfully retrieve missing files from the phone. For instant recovery, try Android Data Recovery as it will help you to recover data from internal as well as external storage, and no need to root your phone. btn_729 James Leak is a technology expert and lives in New York.
