The F4i's taillight is smaller with a new dual-bulb configuration. Retrieved 2013-01-10. ^ Keen, James (November 5, 2010). Retrieved July 22, 2016. ^ "Honda CBR 600 F4i". The F4 is fitted with Honda's HISS engine immobilizer system. Specifications All specifications are claimed by the manufacturer[citation needed] unless otherwise specified. Archived from the original on August 11, 2016. There is additional bracing on the steering head for more response, better feedback and feel from the front end. The 2001 US F4i had a new subframe which raises the seat by 5 mm (0.2 in) that allows for more storage room and improved two-tier seat.[8] The new tail unit has less padding and a higher perch for the passenger. ^ Demortier, Cyril (May 24, 2007). ^ Falconer, Mel (June 17, 2011). Retrieved 2010-11-14. CBR600F4i (2001-2006) Honda CBR600F4i Honda CBR600F4i Sport The CBR600F4i was produced from 2001 to 2006. Retrieved November 25, 2017. CBR600F4.com. Please help improve this article by adding citations to reliable sources. Totalmotorcycle.com. Retrieved 2011-12-27. Top Speed. The style was said to be influenced by a brief European trend toward a smooth and completely enclosed fairing such as in the Ducati Paso.[3] History CBR600F2 (1991-1994) This section needs additional citations for verification. Sport bikeHonda CBR600FHonda CBR600F Hurricane /Honda CBR600F-1 (for UKManufacturerHondaAlso calledHonda Hurricane (US, 1987-1990)Production1987-20062011-2013PredecessorHonda VF500FSuccessorHonda CBR600RR (for CBR600F4i)Honda CBR650F (for 2011 CBR600F)ClassSport bikeRelatedHonda CBR600RR The Honda CBR600F is a CBR series 600 cc (36.6 cu in) four-cylinder sport bike made by Honda. Motorcycle Daily.com. ^ Ets-Hokin, Gabe (November 18, 2010). January 2008. And a fuel consumption of 36.7 mpg-US (6.41 L/100 km; 44.07 mpg-imp).[14] In 2001 and 2002, in recognition of Honda's association with MotoGP champion Valentino Rossi and its 500th motorcycle Grand Prix victory, the CBR600F4i was also released in Europe and Australia (2001 & 2002 only) in two "Rossi Replica" versions. The front brakes were upgraded and the rear wheel increased to 140 mm (5.5 in) with new 3-spoke wheels. The turn stalks are shorter and the mirrors are now positioned higher and closer to the rider. "Honda CBR 600 F4i". Motorcycle News. "What You Can't Have: 2011 Honda CBR600F". But stopping power still was not on par with other bikes in the class. The CDI and ram-air system were also revised to allowed for smoother throttle curve over the 1995-1996 models, which could sometimes be jerky. November 15, 2001. In 1999, it was replaced by the CBR600F4[citation needed]. An aluminium twin-spar frame which reduced frame weight was used, and the engine crankcase was designed to share the swingarm pivot. December 20, 2000. Cycle World tested the F3's acceleration from 0-97 km/h (60 mph) at 3 seconds and 0-402 m (1/4 mi) at 10.9 seconds at 201.62 km/h (125.28 mph).[5] Motorcycle Consumer News recorded a 0-97 km/h (60 mph) time of 3.36 seconds and a quarter mile time of 11.03 seconds at 199.66 km/h (124.06 mph).[6] CBR600F4 (1999-2000) Honda CBR600F4 Honda CBR600F4 The CBR600F4 was produced between 1999 and 2000. Retrieved July 25, 2016. Retrieved 2010-01-11. ^ Beeler, Jensen (May 26, 2012). ^ "Battle of the Superbikes; Ultimate 600 Challenge". Cycle World. p. 36. Motorcycle Consumer News. "Honda CBR600F - CLASSICS REMEMBERED". The F2's development began with meetings to discuss concepts and sketches for the new bike. In 2011, Honda released a more modern model with the same name.[1][2] The original CBR600F along with the CBR750F and CBR1000F was Honda's first inline four-cylinder, fully-faired sport bike. Archived from the original on 2006-06-14. Motorcycle.com. MCNEWS.com.au. Retrieved July 28, 2016. A new suspension had larger 43 mm (1.7 in) forks and used Fireblade parts. "CBR600F4i review". CBR600F (2011-2013) 2011 Honda CBR600F In 2011, Honda released the new CBR600F model built in Italy for the European markets that was not released in America. The spark plug caps had ignition coils built into them. Through a reduction of internal friction and weight, combined with larger valves, shorter stroke and a bigger bore, higher revs were enabled. It featured an Arrow titanium exhaust, Progrip handlebar grips, a rear hugger, single seat cover and an LCR sticker kit as well as combined braking and ABS.[16] The CBR600F shares most of the components with the CB600F Hornet naked bike such as inverted fork though longer by 50 mm (2.0 in) and aluminium mono-backbone frame.[17][18] It is wrapped in a multi-layered full fairing that lowers drag and protects the rider from windblast as well as new instruments, bars and tank. "2006 Honda CBR600F4i". Road Test: 2011 Honda CBR600F ABS and 2004 Honda CBR600F - Sibling rivalry". Motorcycle News.com. "2011 Honda CBR600F - full tech specs". It had a modified engine, ram-air intake and cartridge forks. It replaced the F2, and was produced from 1995 to 1998. The first model of the CBR600F was sold from 1987 to 1990 and is known in the US as the Hurricane. Unsourced material may be challenged and removed. MCNEWS.COM.AU. Motorcycle Monthly. ^ a b Smith, Jerry (May 10, 2015). The weight of the wheels was reduced.[10] The rotor carriers moved out closer to the brake calipers to reduce weight and to improve rigidity. The upgraded F4 has a modified F4 with numerous engine, chassis and bodywork changes. honda. Hurricane LPL Ishikawa led the development of the new bike, known internally as MV9 but also called the F2[citation needed], an alphanumeric that led to its official[citation needed] name: CBR600F2. Archived from the original on 2013-01-10. The 1997 and 1998 models also came with a deeper oil pan, sleeker tail fairings, seat and taillight, and a revised engine head netting about a 3.7 kW (5 hp; 5 PS) gain over 1995-1996 models. It was introduced to replace the original CBR600F Hurricane and was considered one of Honda's most modern and innovative sport bikes.[citation needed] Development of the CBR600F2 began in early 1989. Honda UK. Archived from the original on January 9, 2008. Fuel injection allows for more precise fuel metering and delivery over a wider rpm range, while providing better throttle response and reducing emissions. The F4i had a new dash layout with a large analog tachometer. ^ "1987 Hurricane". ^ "HONDA CBR600F Motorcycle Reviews". Archived from the original on 2006-05-08. The single largest change aside from the styling is the addition of high-pressure 50 psi (340 kPa)[9] PGM-FI (programmed fuel injection) system — thus the model designation "F4i". The suspension has also been tweaked with less high-speed damping and a little more low-speed damping with the shock and fork being more street-bias.[11] Additional engine changes include a lighter camshaft sprocket and increased valve spring pressure (two springs per intake valve) which allow for higher revving. ^ Paul, Paul (July 1, 2014). Painted black, the bike looked faster and sleeker than the more blocky first generation bike and test results were superior: few motorcycles in the 1990s had the performance ability of the F2.[4] CBR600F3 (1995-1998) Honda CBR600F3 The CBR600F3 is the third generation of the CBR600F series. Retrieved July 24, 2016. Retrieved July 27, 2016. "Honda CBR600F LCR Edition - Stefan Bradl's Race Replica". The subsequent models are designated as CBR600F2, F3, F4 and F4i respectively. In a number of countries, the bike was sold in both the "normal" and "Sport" variants, the Sport having a two-part seat, no grab rail and no main stand (though the main stand mounting holes remained). ^ Edge, Dirck (April 5, 2001). "2014 Honda CBR650F - First Ride". Redline is now 14,200 rpm,[10] 700 rpm higher than the previous year's F4.[12] To increase the bike's pulling capabilities at high speeds, the fifth and sixth gears have been shortened slightly and the rear sprocket was enlarged from 45 teeth to 46, also adding one clutch plate for greater durability to now making 8.[12] The oiling holes in the camshafts have been enlarged by 0.5 mm (0.02 in) (to 2.5 mm (0.10 in)) and piston ring friction has been decreased to aid cooling at the higher rev ceiling.[12] Spring pressures on the intake and exhaust valves have been increased to avoid valve float. It also retains a similar relaxed seating position to minimise rider fatigue.[19] The 2011 CBR600F also shares the engine of the highly revised CB600F model that came out in April 2007. Also, there are now two valve springs (inner and outer) on the intake side instead of the single item that resides on the exhaust side.[13] The F4i's new bodywork carries a more Tracy look and provides a 3% reduction in drag. Each injector has four nozzles, and together the injectors add up to 3.7 kW (5 hp; 5 PS) over the F4. Retrieved 2006-06-06. It also houses a new dual headlight front cowl design which uses 40% brighter H7 bulbs compared to the old H4 bulbs.[12] The headlights are dual multi-reflector units covered by a one-piece flexiglass lens. "2001 Honda CBR600F4i: MD Ride Review". In 1996 and 1998, the F3 was also sold in "Smokin' Joe's Replica" versions in the US, Canada and Australia (1998 only). honda.com. "2001-2006 Honda CBR600F4i - SMART MONEY". The injectors reside one per cylinder and work with 38 mm (1.5 in) throttle bodies. ^ "1987 Honda CBR600F Motorcycle Specs". Slightly larger carbs were added and the oil cooler was now located by the oil filter. The elimination of carburetors allowed for a slightly larger air box and a larger 4.8 US gal (18.2 l; 4.0 imp gal) fuel tank. The new LCD digital display had a speedometer, odometer, clock, engine temperature read-out, amber shift light and trip meters. ^ a b c d "First Ride: 2001 Honda CBR600F4i". There are new piston rings that slide with less friction and increased internal engine oil flow. MCN News AU: Honda CBR600 history video CBR600F3 Introduction at motorcyle.com Honda CBR600F Review Honda CBR motorcycle road test 2006 CBR600F4i Review 2006 Honda CBR 600 F4i Sport Bike Motorcycle Dirck Edge (April 2001). Retrieved 2008-03-06. Retrieved 2011-03-17. 18 March 2011. It continues the legacy of the CBR-F line.[15] To honor the German rider Stefan Bradl, Honda Germany launched a special edition of the CBR600F, called CBR600F LCR. External links Wikimedia Commons has media related to Honda CBR600F. ^ "Honda UK Website". The last made 1998 models came with another revised engine head which resulted in a slight power gain. It is the last of the CBR600 series of Honda sport bikes to be carbureted. The phrase "Dedicated to Super Evaluators Dirk Vandenberg and Josef Boyd" are embossed in raised letters on the inside of the F4's upper fairing.[7] the dedication to two of Honda R&D's senior product developers who were killed during the final testing of this model. ^ Cameron, Kevin (January 18, 2017). This engine is a detuned version of that which is available in the 2007 CBR600RR giving a maximum output power of approximately 76 kW (102 hp; 103 PS) at 12,000 rpm and 65 N·m (47.9 lbf·ft) of torque at 10,500 rpm.
