Don Juan stated that in order to arrive at seeing one first had to stop the world. I insisted on talking. I said, Would the gentleman [caballero] permit me to ask some questions? Caballero, which is derived from the world caballo, horse, originally meant horseman or a nobleman on horseback. It was only during an informal conversation that took place towards the end of my apprenticeship that I came to fully realize its scope and importance as one of the main propositions of don Juan¢ÂÂs knowledge. I¢ÂÂm a horseman without a horse, he said with a big smile and then he added, I¢ÂÂm a horseman without a horse as one of the main propositions of don Juan¢ÂÂs knowledge. I¢ÂÂm a horseman without a horse as one of the main propositions of don Juan¢ÂÂs knowledge. was seeing. The termination of the apprenticeship meant that I had learned a new description of the world in a convincing and authentic manner and thus I had become capable of eliciting a new perception. Since I was capable of writing down most of what he said in the beginning of the apprenticeship and everything that was said in the later phases of it, I gathered voluminous field notes. It was at that moment that he lifted his head and looked me squarely in the eyes. Don Juan said, with a broad smile, that in fact it took the young man six months to master such a pronunciation. And I ¢ÃÂll pay you wages. He asked me if I wanted to go with him on a short hike in the desert. We were in the waiting room of a bus depot in Arizona. We exchanged social courtesies for a while and then, in plain terms, I confessed that I had been very devious with him the first time we had met. The bushes made a rattling noise. For a sorcerer, reality, or the world we all know, is only a description. What do you mean? Do you hear that? It was a formidable look. He replied that there was nothing to say about plants, thus to take my money would be unthinkable for him. What are you doing in your pocket? I I leave my years of Famailia before and that meant in my assessment that I was able to take care of myself. No need to say more about that poor boy, he said. I thought my visit that day would not be by no means different from the dozens of times I had seen him in the ten years I was his apprentice. When this boy is more contained, you should tell your friend to do a last thing for him. He looked at me. He was making fun of me in a very subtle and artist way. He would need personal power. What hurts the Spam is having someone always on the back, beating you, saying what to do and what to do. My statement is that all these steps can be understood in terms of the description that he has been struggling to give me since the innio, I must let his teachings be the source of entry into it. I thought he was deliberately changing the top of the conversation to avoid answering me. At this point, Don Juan stopped his recount very dramatically and looked at me. Yes he did. In other words, I won an association. I still don't understand what you mean. In the case of my work with Don Juan, I limited my efforts to only as a sorcerer and to acquire the participation in his knowledge. He knows the description of the world; And its members become complete, I suppose, when he is able to do all the proper perceptual interpretations that, in accordance with this description, validate it. He simply went through the shrubs touching him softly. The events that took place that day and the following days, however, were important to me. I begged him to become my informant in exchange for some kind of monetary reward. Upon now, I have not made any attempt to put Don Juan in a cultural environment. His break was very studied and it seemed a little tacky me, but I played together. The young man's confiscation was a new element and I did not know more how the story would end. If you want to write, writes, he said. Once again, I warned you that I really wanted to learn about plants, especially Peyote. Man, in response to a prearranged cue to be given after any objective behavior by the child, was supposed to jump from a hidden place, take the child and beat the living lights of the day. Don Juan was resting his chin in his palm. The point of the story was that one day a young man decided to prepare to pass the road block, learning to pronounce the test word as the king liked. You are not disturbing me. Don Juan seemed to like my reaction and laughed. What can my friend do? He has added a chryptic declaration: maybe there is nothing to learn about them. Don Juan seemed to be expecting me to ask what happened, so I did. Â & "Paul Riesman, The New York Times Book Review" Strangely beautiful reading. I became a Lingãmpt at the same time and could not continue with the haranquies about me. He said that for a wizard, the world of everyday life does not It is real, or out, as we believe it is. He said that my efforts reminded him of a story about some people that a certain king pursued and killed once. I said my special interest was use From the hallucinogon cactus, Peyote, which I had studied at the university in Los Angeles. I realized that over the years of our association, Don Juan was employing me, although on a different scale, those Same, so that he was suggesting that my friend should use with his son. After the man scares him, his friend should help the boy recover his trust, anyway he can. A friend of mine just put us in touch and left the room and we had introduced each other. He himself timeless, Journey to Ixtlan is one of the important statements of our time." —Barry Corbert, Book World INTRODUCTION ON SATURDAY, May 22, 1971, I went to Sonora, Mexico, to see Don Juan Matus, an Indian wizard Yaqui, with whom I had been associated since 1961. I had discarded these parts of my field notes in my previous work because they did not belong to the use of psychotropic plants. But it was not just a matter of being silenced; there were times when I had been unable to say a word to my opponent because of some inherent respect I felt for him, yet my anger or frustration was manifested in my thoughts. It was a look that went through me. Plants are very peculiar things, he said without looking at me. You'll be working for me, I said. I liked his smile. I told him I didn't understand what he meant. Your friend is not a warrior, he said. My basic assumption in both books has been that the points of articulation in learning to be a sorcerer were the states of the nonorrhea reality produced by the intake of psychotropic plants. I thought obviously he was a man who could appreciate the direction and I decided to face it with a request. I wonder if it would have been appropriate to ask if this statement had some hidden meaning, but I did not; however, it seemed to be tuned with my feelings and continued to explain what it had meaning. That assumption was erroneous. Not yet, he said, smiling. who could not be immediately killed. He pointed out that everyone who comes into contact with a child is a teacher who o rebecrep ed zapac ©Ã a§Ãnairc a euq me otnemom o ©Ãta ,ele arap odnum o evercsed as described. I mean that this child should not be beaten or scared by his father when he does not behave as he wants. What if fear hurts you? The moment he made this statement a strong gust of wind shook the desert chaparral around us. I have prepared for six months, after this first date, reading about the peiote of the planet. I told you about a friend of mine and the dilemma with her nine-year-old son. When I started studying anthropology and thus I met Don Juan, I was already a specialist in getting around. With his time, he said softly. If you were less stubborn, however, now you would probably have stopped the world with any of the techniques I taught you. "Say who was Jewish by the way they pronounced certain words. Total sense, with the proposal of putting it against the old man, and thus break the dogmatic certainty, which we all share, that the validity of our perceptions, or our reality of the world, should not be questioned. $\hat{a} \in "c.c. 1972$ Part to stop the world 1 Refirmament of the world I know you know a lot about plants, sir, I said to the old man in front of me. According to Don Juan, we have no memory of that portentous moment, simply because none of us could have had any point of reference to compare it with any other Oisa. He should let him touch the body once with his left mother, anywhere except the body belly. I thought my presentation was very much. The young man was killed instantly, he he said and broke into a roaring laughter. My difficulty in grasping his concepts and methods stemmed from the fact that the units of his description were alien and incompatible with those of my own. In this respect don Juan was an expert in the use of three such plants: Datura inoxia, commonly known as jimson weed; Lophophora williamsii, known as pevote; and a hallucinogenic mushroom of the genus Psilocybe. In order to render those notes readable and still preserve the dramatic unity of don Juan¢ÂÂs teachings, I have had to edit them, but what I have deleted is, I believe, immaterial to the points I want to raise. he asked casually. I said that I did not want to disturb him by writing in front of him. Are you playing with your whanger? I asked. In Journey to Ixtlan, Carlos Castaneda introduces readers to this new approach for the first time and explores, as he comes to experience it himself, his own final voyage into the teachings of don Juan, sharing with us what it is like to truly ¢ÃÂâstop the world¢ÃÂa and perceive reality on his own terms.Originally drawn to Yaqui Indian spiritual leader don Juan Matus for his knowledge of mind-altering plants, bestselling author Carlos Castaneda immersed himself in the sorcerer¢ÃÂâs magical world entirely. I would go to skid row and hire the worst-looking man I could find. It was early afternoon when I arrived and parked in front of it. In my case the set of circumstances alien to my normal flow of interpretations was the sorcery description of the world. I laughed with him. Afterwards I told him that no matter how stupid I sounded I was really interested in learning something about plants. He said that he had been trying all along to teach me how to stop the world. From that moment on, however, the child is a member. I also knew the punch line: the young man was going to get caught because the official had forgotten the key word and asked him to pronounce another word which was Similar, but the young man had not learned to say correctly. His eyes were very kind. The worst he could do is for the child to agree with him, said Don Juan. I saw him sitting in a wooden milk box. I did not stop the world, but it will work exactly the same. "I asked him to explain his declarations. If he was, he would know that the worst thing can be done is confronting humans Troubled. Taken together, they form a work that is among the best that the science of anthropology has produced. The world will never be the same for him. We walk for a while more, but he has not yet shown me plants, nor showed me He chose none of them. I detected a note of gain in his voice. Don Juan was outlined a strange strategy. "In this case, he should use common means to help his child change his idea of the world. How can be teach him anything if he is not firm with him? I told you that for six months I was reading to prepare for our meeting and that this time I really wanted to work with him. I asked him in a very formal Spanish if he allowed me to guestion him. In short, I can say that when I started learning, there was another reality, that is, there was a description of the world. I really liked the way he had come in my interest; Above all I liked the way he had connected this story to my own case. He wanted to continue to tell him all the terrible things that the child had done, but he interrupted me. One that still has any forms in it. When he told him what he was doing, he laughed at heart. So, what happened? In fact, the reality of the world we know is so taken guaranteed that the basic premise of witchcraft, that our our , in yap ot evah t'nod uoY .gninraw fo enot a ni dias eh ,cincip on sihT .days I ,yob elttil sihbal htiw od dluohs dneirf y tahw tuoba erom in lleT .anozirA ot kcab I.gnihtyna ni detseretni ylurt ,deksa I .seiticirtnecce sih fo eno saw sevael eht htiw tnemeerga eht thguoht I .mih rof hcraes ot dediced dna kool suodneputs taht htiw deugirtni ylhguoroht emaceb I .no sih htiw og dluow eh erehw ecalp a ta mih rof tiaw ro mih wollof nam eht evah ot dneirf ym tcurtsni ot sallam I .sehsub e tagral emos yb tser otnemom a rof deppots eWobey net fo krow I .ytilaer llac ot denrael evah ew noitpircsed eht edistuo dlrow a fo snoitaticilos lautpecrep eht ot gnidnopser sa ezirogetac ot ekil dluow I taht min dlot ylregae I .yllacigetarts sdeecorp roirraw A .seye sin ni tnilg suoveihcsim a htiw in ta dekool dna esuap rehtona edam eH .gniees ot pets tsrif eht saw dlrow eht gnippots taht dna ,gnikool yldlerem ot desoppo sa ees ot wohre in gnihcaet
