| high hopes for this book after the redeeming of the series (for me) in book 4. Just in general, there was so much potential for this series, and I had such expectations both from books 1 and from Clares and Blacks prior works. Now, I get this is a middle grade series. It wont be Devices/The Dark Artifices/etc. I also get that these books are not necessarily aimed towards me, and both the humor and plot are aimed for those younger than I. However, this series, this book, being a part of a younger genre does not excuse some of the issues this series had, es | | |
| llogical nature of some of the decisions in this book, or the lack of effort (it seems) in the planning of this book, and series as a whole. I was honestly surprised when it seemed as if this book left things purposely open for a sequel series, as it honestly felt, while reading, that the au | thor duo seemed to be less and less interested in these books. You can | |
| possibly blame my earlier love for the series on my younger age, but Id argue that those books were just overall better, in terms of character dynamics, plot, and pacing). Yes the trio and world heavily mimicked Harry Potter, and the series definitely n | eeded to move away from that, but that doesnt mean that the series | |
| needed to lose the normal pacing it had in books 1 and 2. And yes, the plot was not complex at all in the earlier books, but it doesnt need to be, as thats not necessarily what I expect from a middle grade book. Lets just get the worst over with and discuss pacing. In books 1 and 2 the and sometimes a bit of the summer beforehand. A standard pacing style for a school based series. Book 3 already broke this pattern by ending about half way through the year (if I remember correctly, its been a few years now), and that sharp contrast in time period definitely left to | | |
| mystery to me, but at the start of book 5, 4 years of schooling have supposedly passed (I dont know how). Book 5, while when looked at logically, takes place over a few months or something, reads like it all takes place within the first week of school or something. There is almost no | | |
| moving plot, and this constant action, combined with weird time jumps/lack of focus on anything but events that directly solve the plot, makes the book read really quickly, as well as feel weirdly timed. Id have to actually study this book to figure out how the timeline all works together. | ther, and even then I cant promise Id find an answer. Additionally, the | |
| allocation of pages to different periods of time didnt add up at all. There are a few moments of travelling and driving in this book, but the pacing and logistics of them is so ridiculous that I couldnt even fully take those seriously and as a part of the actual plot/story. It honestly just follow. As Im already on the subject, lets talk about the plot. Arguably, the second worst part of this book next to the pacing. There is no true conflict in this book, Nothing goes wrong, nothing is lost, and anytime something gets in the way of Call/Tamara/Aaron, even the main evil of | | |
| solution is almost always presented immediately. Additionally, this lack of struggle means the entire book reads at the exact same amount of tension. There are no highs and lows. It is all action, and since there are no dull moments to make that action exciting by comparison, the action are the exact same amount of tension. | | |
| this installment. Book 4 seemed to neatly wrap up everything in a bow for our duo/trio, so this book definitely needed something to bring that evil back to the forefront, some whispers of dark magic or evil returning rather than just a single hint and then sudden entrance of the big | bad. The characters themselves were also just weaker than in past | |
| installments. Calls main focus was staring at Tamara and worrying about college, admittedly mundane worries for someone with an evil soul who also happens to be harboring the spirit of his dead best friend inside of him. Call ended up being such a let down that I wont even spen was ridiculous to the point of absurdity, and nothing close to the level of evil the past books seemed to contain. I mean, Alex freaking killed someone for their powers, and you cant even meet that level for your finale? Come on guys. I almost never say this, but this but this series sh | d more words on him. Additionally, what the heck was this villain? He | |
| f things had just ended on book 4. I cant say much good about this particular book, but at least it was a quick read. January 3, 2019 Finally done with this series! Honestly, I'm a bit disappointed. The whole series seems so rushed. There could have been a lot more world-building for | | |

A lot of the things were never explained throughout the series. It was okay in the first or second books in the series but I kept on hop happened. Not much about chaos magic was explained or the Devoured and how all that works. Things were thrown at me throughout the series without ever explaining why or how. Things that I didn't like were not much explanation about anything, Alistair being the Devoured of air magic, Call and Tamara as a couple and Anastasia dying at the end. I mean there could have been a better ending but fine. Throw | ing the ancient mage at us and not even exploring anything further. | |
| That's one problem I have with this series, things not being explored further. These things are there just to help move the story along. But I will burn for your sake all the same."The Magisterium series comes to its conclusion with The Golden Tower, a solid finale while not being anything lifechanging. This book is disappointingly not one of my favour whole and found it to be fun. I had heard many reviews saying that this book wasn't great, so I tried my best to lower my expectations prior to jumping in to it. That was definitely the right way to go, as I decided to just read it for enjoyment and try to ignore the plot holes.
